

Mahesh Foundation's 100 Bed Charitable Hospital

Higher standards of care every day

Nowadays poor people are unable to afford healthcare. The conditions have worsened after the hit of the COVID-19 pandemic. In severe cases, these underprivileged people should go to private hospitals but private hospitals are expensive these days and this will create a burden on the poor people

Here is the site in Kanabargi, Belagavi where Mahesh Foundation is building 100-bed Charitable Hospital and aspires to help the underprivileged people of the society to avail quality health services free of cost.

This intervention will also be an attempt to satisfy the concern of better health care to rural people who lack facilities in Primary Health Center. This proposed charitable hospital is expected to be completed and ready for operations within a year.

The Charitable Hospital will be built up in a total area of 41000 sq. ft. with the necessary infrastructure. The modern way of treatment using the latest technology and medical equipment.

The hospital will help the underprivileged people residing in rural areas get free quality health care facilities. It will have 100 beds and that could benefit the needy people who struggle to afford health care in private hospitals.

Currently, the retaining wall construction has been completed. Soon, we will start the construction of the hospital and we intend to complete it at the earliest to make it available to serve the needy people.

The 100-Bed Charitable Hospital is a dream project of Mahesh Foundation. The hospital was designed by the famous architect Mr. Alok Shetty and Bhumiputra Team. Here are the external 3D renders.

It is expected that every month it will serve around 300-400 needy people and around 2000-3000 patients every year. As there are possibilities of COVID-19 waves in the coming days, the hospital will also serve such patients in times of crisis. The hospital will have world class facilities with IP & OPD facilities Diagnostic unit and more to render its services to the needy.

The hospital will provide the ambulance services to the poor people residing in the nearby rural areas. This proposed charitable hospital is expected to be completed and ready for operations within a year.

Quality healthcare to those in need
