New School & Skill Center

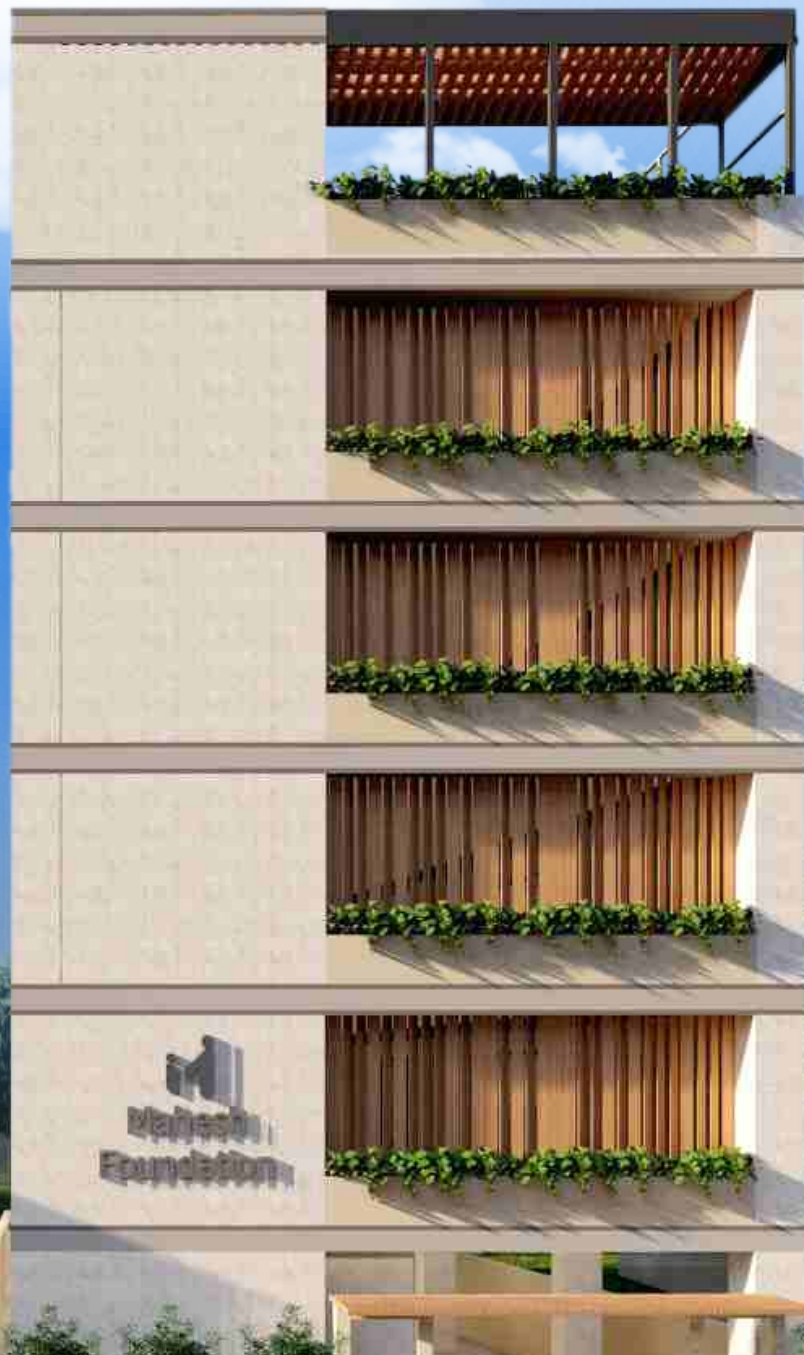

"Building"
a brighter future
for underprivileged

This Building is
designed by

Bhumiputra Architecture
Bengaluru

**Mahesh Foundation's
Proposed New School and
Skill Center Building**

A composite building for extended classrooms and Skills center will help thousands of students and underprivileged women.

This 5-floor building will include **well-equipped training centers and digitalized classrooms.**

The Terous area will be utilized as a play area for children. This play area will be well maintained with all security measures.

Side views of the proposed school and skill center building.
This building will have **well-ventilated classrooms and training centers** with a natural environment.

This will help more than **500 Underprivileged children to get free and quality education** in the coming years.

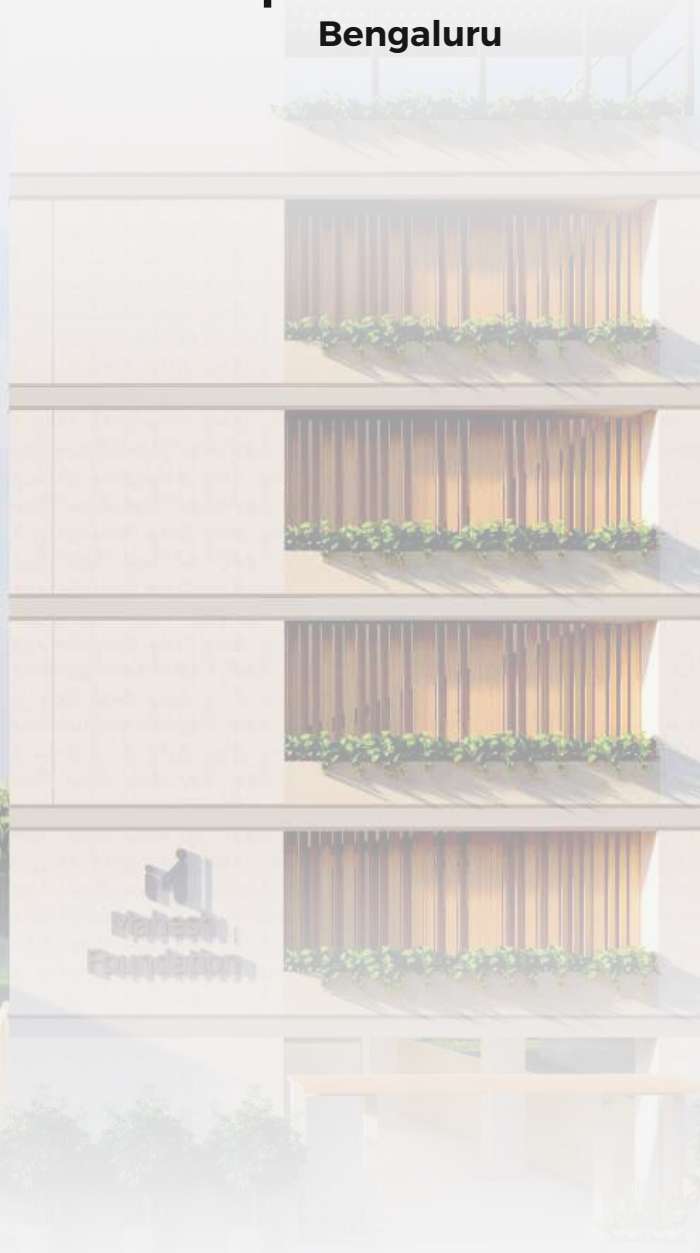

**2000+ poor adolescent girls and women would be trained
and would be engaged in income generation activities.**
